

Hospital

Stocking Penetration & Turnover Analysis

Hospital PIP™ tracks stocking penetration, nationally projected inventory, 30-day movement, as well as all-important formulary status (including restrictions) in acute care general hospitals nationwide. Annual purchases and net acquisition costs are also available.

Retail PIP™ tracks product level stocking and inventories monthly in a representative panel of 400 stores drawn from over 7,000 participating pharmacies across the country. The accuracy of DMD pricing information and prescription data have been relied on pharmaceutical marketers for over 30 years.

DMD PIP Reports have become a standard tool throughout the industry.

- ▶ Helps forecast uptake for product/package changes
- ▶ Invaluable for production planning purposes
- ▶ Helps determine impact of price adjustments

Seeing Beyond the Data™
